

Limited Warranty for PV Modules

This document is a contract between you and Jinko Solar. It describes the terms and conditions of the limited warranty for the PV modules that you purchase from Jinko Solar. Please read this document carefully before you purchase the PV modules. If you do not agree to the terms and conditions of this limited warranty, you should not purchase the PV modules from Jinko Solar.

1. Limited Product Warranty – Ten Year Repair or Replacement

Jinko Solar warrants that the PV modules will be free from defects in materials and workmanship under normal use and service for a period of ten (10) years from the date of shipment. If a defect in materials or workmanship is discovered during this period, Jinko Solar will, at its option, repair or replace the defective PV module. This warranty is limited to the PV module and does not cover any other components of the solar system. The warranty is void if the PV module is damaged by fire, flood, theft, vandalism, or other causes not covered by this warranty. Jinko Solar is not responsible for any consequential or incidental damages. This warranty is provided as a courtesy and does not constitute an offer of insurance or any other financial product.

2. Limited Peak Power Warranty– Limited Remedy

Jinko Solar warrants that the PV modules will produce a minimum amount of power over the life of the PV module. The power output is measured under standard test conditions (STC). The power output is guaranteed to be within a certain percentage of the rated power output for the life of the PV module.

$$I \cdot F$$

At the end of the warranty period, the power output of the PV module will be guaranteed to be within a certain percentage of the rated power output. If the power output is below the guaranteed level, Jinko Solar will, at its option, repair or replace the PV module.

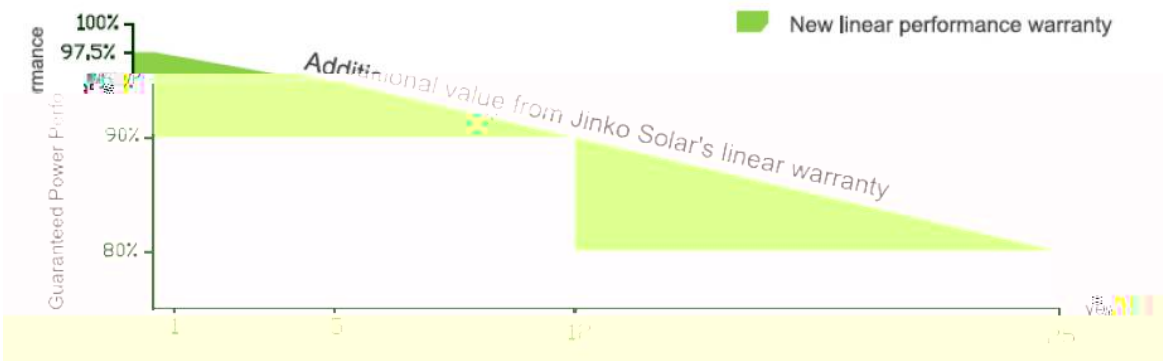

• If the power output is below the guaranteed level, Jinko Solar will, at its option, repair or replace the PV module.

• If the power output is below the guaranteed level, Jinko Solar will, at its option, repair or replace the PV module.
